PAGES

ORIGIN [REDACTED]

SUPPLEMENT

25X1X6

1. On the night of 9-10 October 1946, about 0400 hours, six rocket-like missiles were sighted above Forst (A77), proceeding at five minute intervals from northeast to south, in the general direction of Weisswasser (A74). These missiles are said to have radiated light at both nose and tail.
2. Two other sources, who claim to have made some investigation of the matter, state that such weapons are being fired from a location along the Polish border area. They do not believe that launching sites exist in the Cottbus-Guben-Forst region.
3. On 11 October, these sources observed three such missiles moving at five minute intervals. On 13 October, four more passed at fifteen minute intervals.
